

R&D Regulation Engineer (gn)

(19095)

📍 Place of employment: Kaufering 📄 Type(s) of employment: AÜ, Mobiles Arbeiten, Vollzeit
📄 Salary range: 55000 - 85000 Euro pro Jahr 📅 Start of employment: As of now

A job is more than just a job. It should be the right fit for you, challenge you, and offer fair compensation. That's exactly how we see it at PAMEC. We connect you with companies that truly match your skills, goals, and ambitions. When you love your job, we know we've done ours right – and we've been doing just that since 1984.

For our renowned client, a leading international corporation, we are looking for a R&D Regulation Engineer (gn).

This is what your day-to-day work will look like

- Monitor and evaluate **international product regulations**
- **Assess regulatory impacts** on products, documentation and market access
- Prepare and maintain **compliance and certification documentation**
- Coordinate **national approvals** and **support certification projects** worldwide
- Process **regulatory requests** from Market Organizations and internal stakeholders
- Review and manage **product markings, labels, rating plates and approval marks**

What makes you a great fit

- University degree in engineering (e.g. electrical, mechanical, mechatronics) or a comparable technical qualification
- Experience in regulatory compliance, conformity assessment, or regulatory affairs
- Experience with technical documentation, risk management, and compliance documentation
- Ability to work independently and communicate effectively with cross-functional teams
- Very good English skills (written and spoken); German knowledge is an advantage

Your benefits

- Permanent employment contract with the opportunity for a long-term position at our partner company
- Compensation based on the GVP collective agreement, with the possibility of additional above-agreement allowances, holiday and Christmas bonuses, as well as a company pension scheme
- Employee referral bonus of up to **€ 400** through our "Refer a Friend" program
- Convenient digital processes, including **vacation requests** and **timesheet** submissions via **app**, **plus employee discounts** at various online shops

Ready for your next challenge?
